

## Large HOW myMix System with integrated intercom

- 18 myMix for musicians**
- 3 myMix for engineers- also as intercom**
- 4 myMix to wireless IEM transmitters**

Large set up with a total of 90 audio network channels.

Inputs to myMix:  
 24 instruments (mic splitter)  
 8 wireless mic channels  
 16 submixes from console  
 18 stereo mixes (= 36) from myMix  
 3 talkback mics (= 6 channels)

Two Multi8 and one Power8 are connected to the GB uplink ports of the central Power12(N) switch.

4 myMix used to feed stereo mixes to wireless IEM transmitters. Eight channels of the wireless receivers are fed via IEX16 to the myMix system for monitoring by the RF engineer. The crew is using myMix with headsets as intercom system.

The myMix PLUG interface for myMix CONTROL as well as the client computer are also connected to the Multi8 at FOH position.
