RME AD/DA Converters

ADI-2 Pro

ADI-2 DAC

A new experience in sound and quality

RME's innovative 32-bit ADI-2 series takes AD/DA conversion to a new and unrivalled level. Uncompromising quality, feature rich dynamics and pristine audio make the ADI-2 Pro and ADI-2 DAC the outstanding choice for studio reference playback, professional mastering and audiophile listening environments.

The Extreme-Power headphone stage ensures an incomparable performance thanks to the premium DAC - even when using low impedance headphones. Sample rates of up to 768Khz, SteadyClock FS (femtosecond), DSD 256 recording and playback and direct DSD ensure a ground-breaking and unique listening experience.

Easy USB operation for MAC, PC and iOS Devices. Class Compliant ready!

Up to 768 kHz Sample Rate with SteadyClock FS technology, highly efficient jitter suppression refreshes and cleans up any clock signal.
